

Addendum to Financial Assistance Policy

(from Section I, Part C)

Services Covered and Not Covered

Patients who qualify for financial assistance may receive services which are not covered under the hospital's Financial Assistance Policy (FAP). These services are typically performed by providers not employed or contracted by the hospital. This also includes services provided by the hospital's sister corporation, Sturdy Health Medical Group, which consists of primary care, urgent care and specialty physician practices located in the hospital's service area. The following table lists services that are covered and not covered under the FAP. Patients that qualify for public and/or hospital assistance may receive bills from providers for services listed as not covered.
